

Companion Value Seed Packs

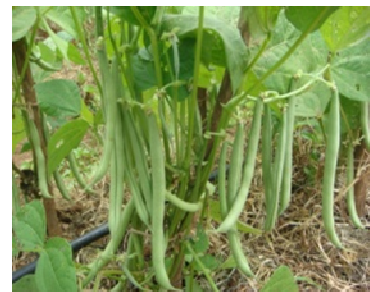

Corn - Cucumber - Beans

Corn – Pop corn Purple

Cucumber – Coromandel Coast

Beans - Victoria

Lettuce – Oak Leaf

Cosmos - Orange

- ✦ **Corn** repels cucumber fly. It provides a natural trellis for the Beans and offers shade to Cucumber. Corn protects cucumber against the virus that causes wilt.
- ✦ **Cucumber** attracts ground beetle. It retains soil moisture and repels weeds.
- ✦ **Beans** are great for heavy nitrogen users like Corn as the nitrogen used by Corn is replaced by the beans, at the end of its life-cycle.
- ✦ **Lettuce** appreciates the shade offered by corn. It traps white worm which can otherwise damage roots of the main vegetable plants. It also deters slugs and snails from attacking the main crop.
- ✦ **Cosmos** attracts pollinators and predators, while repelling harmful insects.
