

• Salad Splendor

Lettuce - Winter Marvel

The smooth, slightly wavy and pale green leaves form a large head. This variety is extremely resistant to cold. It is a winter crop.

Yield per hectare: 15t

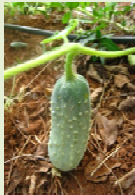

Tomato- Galina

This early variety produces heavy clusters of round golden-yellow, cherry tomatoes. The flavor is juicy, sweet and acidic at the same time. These plants are very vigorous and high yielding. Indeterminate growth.

Yield per hectare: 30t

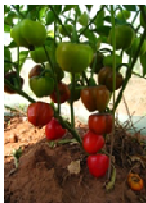

Cucumber - Coromandel Coast

The 15 to 20 cm long fruits are light green and very sweet. Even the over mature fruits are fully-edible juicy and crunchy. A vigorous producer, native to coastal Tamil Nadu.

Yield per hectare: 6t

Capsicum - Mini Red Bell

This miniature bell pepper variety grows up to 40cm and may bear up to 60 fruits. The 2-3 lobed green fruits are 5cm long and turn red when fully ripe. The flesh is thick and very sweet. A good source of raw Vitamin C for children. A farmer friendly variety; excellent for kitchen gardens.

Yield per hectare: 22t

Tomato- Podland Pink

The vigorous vines produce abundant trusses of small oblong fruits. The color of the fruits is unique as they turn from pale yellow to pink when fully ripe. Completely drought resistant. Excellent for kitchen gardens; a farmer friendly variety.

Yield per hectare: 35t
